

Every Mile Makes You Smile

Giving children the safe travel they deserve

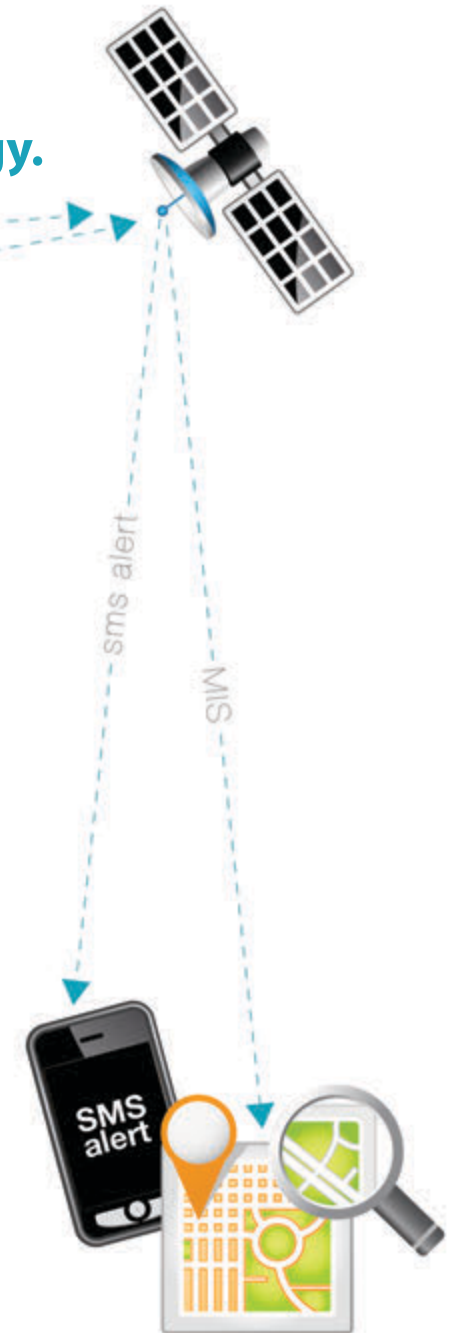

Child Safety Assurance Solution

In modern day education arena, sophisticated infrastructure, effective curriculum has become common factor in all schools and technology is the only differentiator. Chaotic traffic, unguarded school vehicles and erratic driving patterns are posing greater threats to the safety of children during transit. Time pressed parents / vehicles can't afford to waste time at pickup/drop points.

By looking holistically at all the challenges in school children transportation, telematics4u has designed and is delivering Child Safety Assurance System (CSAS) across the globe and is contributing in its own capacity towards securing the lives of children.

Child Safety Assurance Solution (CSAS) designed to monitor, streamline school transport services and safeguard the lives of children. CSAS is a comprehensive solution, built using state-of-the-art technology.

Benefits to School Management:

- E-mail/Popup/SMS alerts to school authorities during over speeding, overcrowding, stoppage violation and route deviation
- Vehicle Maintenance Adherence Audit, ensuring child safety
- Fuel Management for cost optimisation
- Driver Evaluation System for ensuring disciplined driving pattern
- Real-time info on vehicle location, driver and students on board
- Flexible and agile technology platform, capable of integrating with any school management system
- RFID based student identification system to enhance students safety
- Support for school in complying to Govt. regulations and guidelines
- Vehicle productivity MIS for optimizing operations and usage

Benefits for Parents:

- Implementation of 'Child Dis-Embarkation Confirmation Mechanism (CDCM)' ensures safety of Kids
- Incorporation of 'Emergency Alert Mechanism (EAM)' ensures instant support to Kids and drivers in case of an emergency situation
- Pre-pickup & pre-drop SMS alerts to parents facilitates their scheduling
- School reach alert to parents reduces anxiety among parents
- Easy access on your mobile
- Support desk call centre facility to avail real-time bus status, which prevents driver distraction

Our smart solution for school transport is built leveraging deep domain understanding and technology expertise. The result is a cutting-edge solution of global standards.

Endeavour Africa with t4u - Leading the way
